

## Datasheet: Tablet Booker App

Cordic's Tablet Booker App enables taxi and private hire operators to increase their job bookings and revenues via business customers and partners (hotels, restaurants etc).

The App allows these customers to seamlessly obtain a quote and book jobs entirely on their own without involving your office staff.

### Benefits include...

A self-service booking solution

Quick and easy passenger bookings

Customisable features

### **A self-service booking solution**

The Tablet Booker App can be located in your customers' hotels and restaurants, or even in front of your office. You can have them located anywhere to provide a self-service booking facility, or encourage venue staff, such as receptionists, to book a job through the app rather than calling your office.

For example, a restaurant waiter can take a booking for their customer using the same tablet that they took the food order with, or a tablet with the app can be located in a doctor's waiting room, or at an information desk within an airport or train station, making booking a taxi hassle-free and convenient.

The app can be downloaded onto a Windows, Android or Apple device, and can be used in 3G/4G and Wifi areas.

Passengers will pay the driver at the end of the journey by cash or Chip & PIN (if supported in the vehicle).

### **Quick and easy passenger bookings**

Passengers or venue staff can enter booking details quick and easily using the app. The job is then created directly onto your cPAQ booking system, reducing calls to your office.

You can configure the app to guide your user through the booking information you need. There is a lot of flexibility, allowing you to choose from a range of booking screens and selecting what you want to appear on each screen.

### **Customisable features**

The app has a wide range of features, including a UK wide address search facility with the option for setting a default address. Quick quotations; ASAP, advanced and cash bookings; a choice of cars, and email or text booking confirmation.

Fully customisable screens allow you to choose what information you require from the person booking a taxi (for example, pickup time, type of vehicle needed etc).

You can also customise the app to tie in with your company brand identity.
