

CORDIC

Product Manager

Location – Cambridge, CB24 4UG

Duration – Permanent / Full Time

Sector – IT

Cordic Ltd is the leading provider of cloud based despatch software for the ground transportation and taxi & private hire sector. Our innovative solutions help hundreds of companies and tens of thousands of cars thrive in a fast moving industry which is facing many changes. With autonomous vehicles on our streets, innovative uses of machine learning, cloud computing and consumers becoming ever more tech savvy, Cordic offers the opportunity to work in some of the most exciting areas of technology being developed today.

Since its inception in 2002, the people at Cordic have been pioneers in cutting edge technology which has revolutionised the industry and now, due to recent investment, Cordic is looking to set the bar even higher, develop new and original ideas and lead the way into the future of this exciting sector. We are currently looking for ambitious and progressive individuals to help us achieve this goal.

Cordic provides an exciting and stimulating environment with endless opportunity for growth and development. We are looking for someone to join the Cordic family who can think outside the box and can bring fresh and exciting ideas to this rapidly expanding company.

The Product Manager has an instrumental part to play in the creation of Cordic's products. You will need to understand the needs of our users and the demands of the business domain we operate within to create a vision for our products. Working with the development teams on a daily basis you will be the voice of our customers and see your ideas turned into reality.

You will develop an intimate knowledge and understanding of our products, taking responsibility for tactical product decisions. Ultimately, you'll help us roll-out products that deliver Cordic's vision.

Based in the North of Cambridge, within easy access of the A14, the Cordic office is on the edge of the inspiring city where many advanced tech companies are based including various other ground-breaking mobility technology businesses.

As a Product Manager you will:

- Research and analyse the market and users to define product vision, road-map and to identify growth opportunities.
- Keep track of our competitors and industry trends.
- Serve as a product expert to the development team to ensure the customer's perspective is represented during the development life cycle.
- Work with QA to ensure the functional requirements of new features are tested.
- Work with sales, support and development teams to identify and define new features for the product.
- Work with the marketing team to create a marketing strategy for new product releases.
- Manage and prioritise product feature backlog.
- Lead the planning of product release plans and set expectation for delivery of new functionality.

The successful candidate will have the following skills and experience:

- Self-starter with enthusiasm and ambition to create world class products.
- Commercial awareness.
- Good understanding of the software development lifecycle.
- Outstanding communication, presentation and leadership skills.
- Excellent organisational and time management skills.
- Sharp analytical and problem-solving skills.
- Creative thinker with a vision.
- Exceptional attention to detail.
- A good degree in either a technical or business field.

In return, you will receive a competitive salary, pension, life insurance, BUPA membership, discretionary annual bonus scheme, Pizza Fridays.

To apply for the Software Engineer – Apps role, please email your CV with a cover letter to jobs@cordic.com quoting the job title. No agencies please.
