

CORDIC

Software Development Team Lead

Location – Cambridge, CB24 4UG

Duration – Permanent / Full Time

Sector – IT

Cordic Ltd is the leading provider of cloud based despatch software for the ground transportation and taxi & private hire sector. Our innovative solutions help hundreds of companies and tens of thousands of cars thrive in a fast moving industry which is facing many changes. With autonomous vehicles on our streets, innovative uses of machine learning, cloud computing and consumers becoming ever more tech savvy, Cordic offers the opportunity to work in some of the most exciting areas of technology being developed today.

Since its inception in 2002, the people at Cordic have been pioneers in cutting edge technology which has revolutionised the industry and now, due to recent investment, Cordic is looking to set the bar even higher, develop new and original ideas and lead the way into the future of this exciting sector. We are currently looking for ambitious and progressive individuals to help us achieve this goal.

The multi-disciplinary you will lead will be developing solutions across different platforms - Web, Android, iOS and Windows as well as having exposure to a variety of different technologies – including C++, Typescript, Angular, Java, Objective C and SQL.

Cordic provides an exciting and stimulating environment with endless opportunity for growth and development. We are looking for someone to join the Cordic family who can think outside the box and can bring fresh and exciting ideas to this rapidly expanding company.

Based in the North of Cambridge, within easy access of the A14, the Cordic office is on the edge of the inspiring city where many advanced tech companies are based including various other ground-breaking mobility technology businesses.

As a Software Development Team Lead you will:

- Lead a multi-disciplinary team responsible for designing, developing and testing highly complex software solutions.
- Develop solutions targeting different platforms – Web, iOS, Android and Windows utilising a breadth of technologies including C++, Typescript, Angular, Java, Objective C and SQL.
- Take ownership of the software development life cycle for the products your team is responsible for.
- Mentor junior members of the team.
- Design and develop new features.
- Work with QA, tech support and marketing to ensure your teams' deliverables are successfully launched.
- Work in all areas of the technology stack, utilising your existing skills whilst developing any new skills you need to ensure you are at the forefront of your profession.

The successful candidate will have the following skills and experience:

- Degree in computer science or equivalent relevant technical subject
- Experience leading a multi-disciplinary development team
- Full software development life cycle experience
- Previous experience developing database centric enterprise applications utilising skills in one of the following areas:
 - C++ on Windows
 - Angular and Typescript on Web
 - Java on Android
 - Objective C on iOS
- Excellent communication, problem solving and analytical skills
- Enthusiasm, passion and drive to create new and exciting software solutions

CORDIC

Any of the following skills would also be advantageous:

- Experience developing or consuming RESTful API's.
- Experience developing mobile aware web applications.
- Native mobile app development on either Android or iOS.
- Microsoft Certified Professional.

In return, you will receive a competitive salary, pension, life insurance, BUPA membership, discretionary annual bonus scheme, Pizza Fridays.

To apply for the Software Development Team Lead role, please email your CV with a cover letter to jobs@cordic.com quoting the job title. No agencies please.
