

CORDIC

Software Engineer - Apps

Location – Cambridge, CB24 4UG
Duration – Permanent / Full Time
Sector – IT

Cordic Ltd is the leading provider of cloud based despatch software for the ground transportation and taxi & private hire sector. Our innovative solutions help hundreds of companies and tens of thousands of cars thrive in a fast moving industry which is facing many changes. With autonomous vehicles on our streets, innovative uses of machine learning, cloud computing and consumers becoming ever more tech savvy, Cordic offers the opportunity to work in some of the most exciting areas of technology being developed today.

Since its inception in 2002, the people at Cordic have been pioneers in cutting edge technology which has revolutionised the industry and now, due to recent investment, Cordic is looking to set the bar even higher, develop new and original ideas and lead the way into the future of this exciting sector. We are currently looking for ambitious and progressive individuals to help us achieve this goal.

Based in the North of Cambridge, within easy access of the A14, the Cordic office is on the edge of the inspiring city where many advanced tech companies are based including various other ground-breaking mobility technology businesses.

As a Software Engineer – Apps you will:

- Design and develop new features in Cordic's Smart Phone apps.
- Work as part of a multi-disciplinary team delivering full stack solutions.
- Develop highly testable code and write unit tests to ensure solutions are production ready.
- Keep abreast of technological trends and latest developments to develop your skill set to ensure you are at the forefront of your profession.

The successful candidate will have the following skills and experience:

- Degree in computer science or equivalent technical subject.
- Previous experience working in a similar software engineering role.
- Experience developing apps using either Java on Android or Objective C on iOS.
- Excellent communication, problem solving and analytical skills.
- Enthusiasm, passion and drive to create new and exciting software solutions.

Any of the following skills would also be advantageous:

- UI / UX design experience.
- Experience developing apps that consume RESTful API's.
- Experience developing hybrid apps using Angular, ionic and electron.

In return, you will receive a competitive salary, pension, life insurance, BUPA membership, discretionary annual bonus scheme, Pizza Fridays.

To apply for the Software Engineer – Apps role, please email your CV with a cover letter to jobs@cordic.com quoting the job title. No agencies please.
