Embeddable quotation widget for fast quotes

Web Booker 3.0 allows you to enhance your website with a professional web booking tool that is easy to configure and provides your customers with all they need to manage their bookings online.

You have the option to either embed a compact quotation widget for fast quotes onto your homepage, or have it link seamlessly to the full booking pages by tailoring Web Booker 3.0 to match your brand.

Payment protection

This booking module offers 3D Secure payment protection on all card transactions. It also supports cash and account bookings.

The features ensure your customers have a safe and secure process to make online bookings. Even if you don't embed the Web Booker 3.0 widget into your site, additional features such as accurate estimates, links to your terms and conditions, and contact details enhance trust, as does the 3D Secure payment protection checks.

Managing online bookings

Guest users are able to track or cancel their booking, book a return journey, and view and/or rebook their completed bookings. The booking module also displays a map view with clear routes, available vehicles, and ETAs on different vehicle types.

You can choose between allowing your online visitors to book trips as a guest user, or simply obtain a quote before registering to complete their booking.
